DETAILED ACTION

Status of the Claims

1. Amendment filed September 10, 2003 has been entered. Claims 69 and 72-74 have been amended. Claims 55-74 are pending. Claims 55-68 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8, dated July 30, 2002.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 69-74 are rejected under 35 U.S.C. 102(b) as being anticipated by Applicant admitted prior art (hereafter APA).

APA teaches a semiconductor construction as claimed including:

a semiconductor substrate (12) having a trench (20) extending partially therein and upper surfaces adjacent the trench;

an oxide layer (36) formed over the upper surfaces of the semiconductor substrate (12) and having an uppermost surface;

and an insulative material (30) filling the trench and having a portion outward of the trench and semiconductor substrate (12), the portion comprising an outermost upper surface

elevationally above the uppermost surface of the oxide layer (36) and sidewalls connecting the outermost upper surface with the oxide layer (36), the sidewalls comprising first and second curved segments, the first curved segment extending from the outermost upper surface and comprising a first apex directed away from the substrate (12), and the second curved segment extending from the first curved segment to the oxide layer (36) and comprising a second apex directed toward the substrate (12). (See Fig. 12).

With respect to claim 70, the insulative material (30) of APA comprises oxide.

With respect to claim 71, the insulative material (30) of APA comprises a first insulative material (24) partially filling the trench (20) and a second insulative material (28) formed over the first insulative material (24).

With respect to claim 72, the semiconductor construction of APA further comprising a polysilicon layer (38) formed against the uppermost surface of the oxide layer (36) and the portion of the insulative material (30). (See Fig. 12).

With respect to claim 73, the trench (20) of APA comprises sidewalls connected by a bottom wall, and wherein the first curved segments of the portion are elevationally above and between the sidewalls of the trench.

With respect to claim 74, the trench (20) of APA comprises sidewalls connected by a bottom wall, and the first curved segments of the portion are directly over the bottom wall of the trench (20).

Response to Arguments

3. Applicant's arguments with respect to claims 69-74 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anh D. Mai whose telephone number is (703) 305-0575. The examiner can normally be reached on 8:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on (703) 308-4918. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
